IN CHILD WELFARE

Adams County

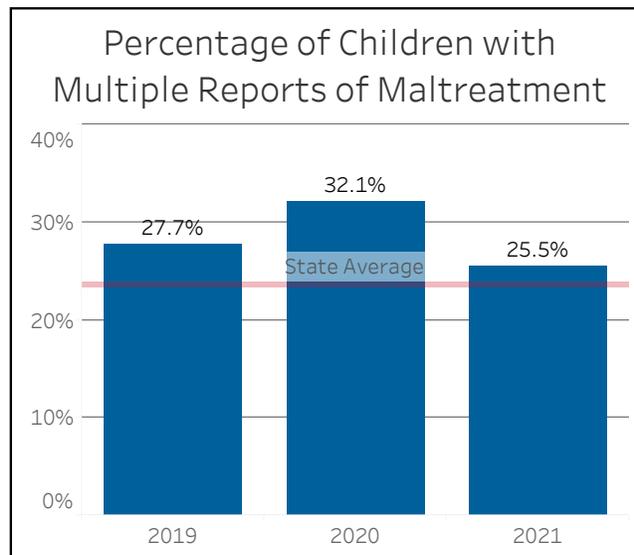

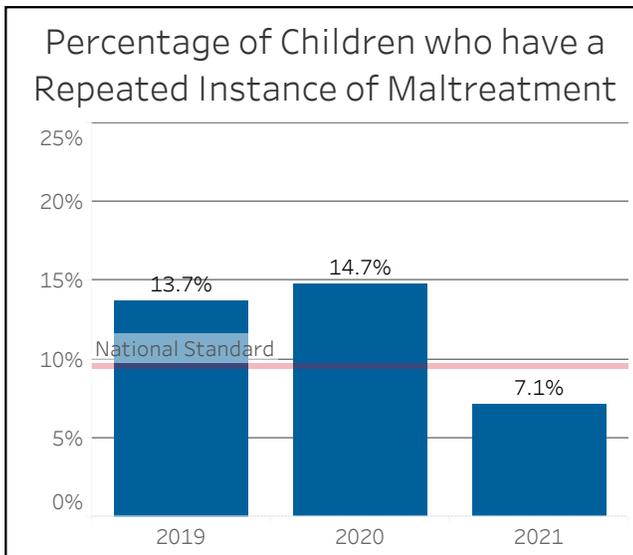

Are child welfare reforms having an impact? Read the full report to learn more about performance measures and hear perspectives from youth with lived experience in foster care.

<https://cdfohio.org/policy/resources/kids-count/kids-count-databooks/>

Child Population: 6,587	Children in Care: 233	Maltreatment Recurrence Rate: 7.1%
Black: 1%	Rate of Maltreatment: 14.4	Re-entry Rate: 9.3%
Hispanic: 1%	Placement Rate: 35.4	Report Recurrence Rate: 25.5%
White: 97%		

First and foremost, keep children safe.

This profile includes key indicators that measure how well communities are doing in ensuring the safety, permanency, stability and equity of children and youth who experience maltreatment. The measures are important but they don't tell the whole story. Youth with lived experience have spoken: Ohio must systematically capture youth experiences from their own perspective to measure performance.

Notes: Child population by race and hispanic origin is from 2019. Placement rates: In 2020, the rate of children per 1,000 in the population who were in substitute or foster care. Maltreatment rate: In 2020, the rate of children per 1,000 in the population who had a substantiated report of child abuse or neglect. Maltreatment Recurrence Rate: In 2021, the percent of children who were victims of a substantiated report of maltreatment during a 12-month period, that were victims of another substantiated maltreatment report within 12 months of their initial report. Re-entry rate: In 2021, the percent of children discharged to reunification, living with a relative, or guardianship 12 months ago that re-entered foster care within 12 months. Maltreatment Report Recurrence: In 2021, the percent of children with a screened-in report of maltreatment during a 12 month period (regardless of finding) who had another screened-in report within 12 months. Standards and averages are shown using a red line in charts.

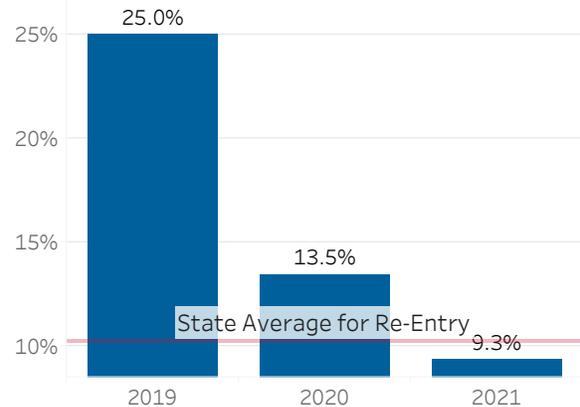

Every child deserves to be listened to.

Youth who have been in foster care said the most effective performance measures should be captured from youth themselves. Ask them: Do you feel safe in your placement? How would you rate your relationship with your caseworker? Are you aware of the Foster Youth Bill of Rights? Responses to these questions should be measured at the county-level and included alongside other measures when evaluating the impact of reforms.

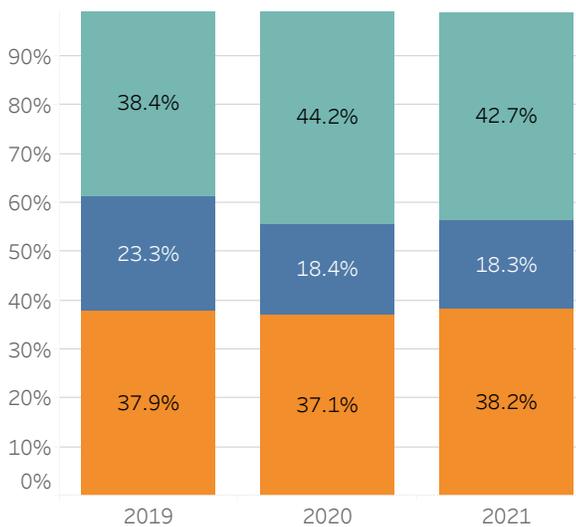

Total Number of Youth who Aged out of Foster Care

Note: Counties have blank data if there are fewer than 10 children or if the rate was zero during the period.

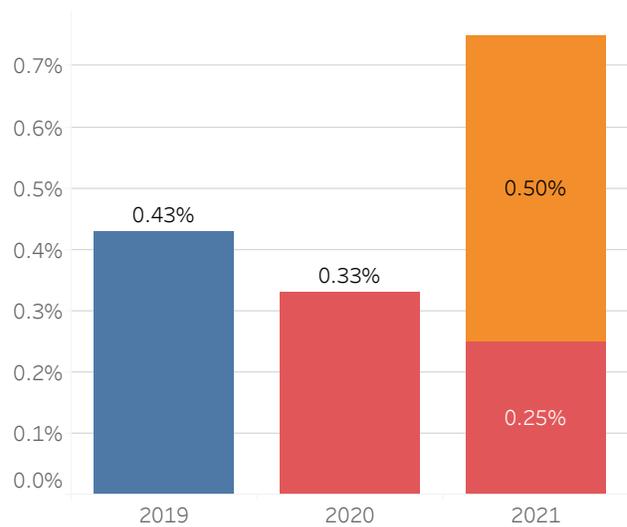

Percent of Children who Re-enter Care within the Year

Percent of Children Placed in Congregant Care, Kinship Care and Family Foster Care

Percent of Children who Experienced a Trial Home Visit, Independent Living, or who Ran Away

Placement Category

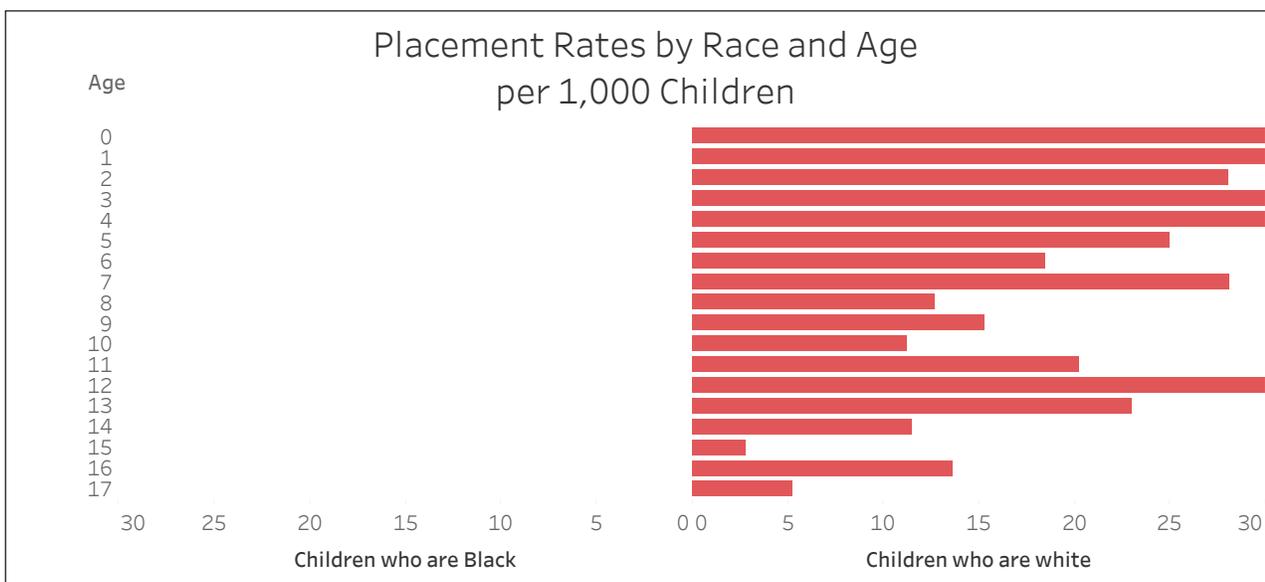

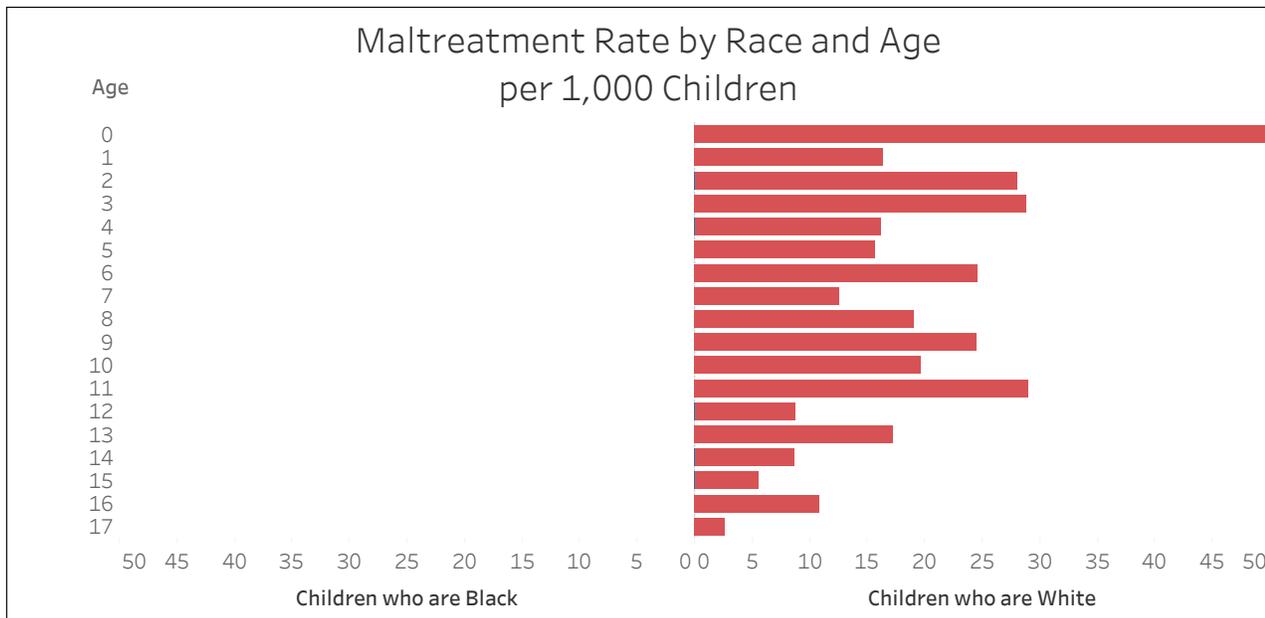

- Kinship Care
- Congregate Care
- Family Foster Care

Placement Type

- Children who run away
- Independent Living
- Trial Home Visit

Racial equity must remain central.

Rates of maltreatment and placement by age and race show disparities among children who are Black and white. Reforms must address racial equity and be evaluated for different demographics. Not only race and ethnicity, but age, sexuality, gender, and disabilities are all characteristics that are important to recognize and drill into. Racial disparity measures indicate there is an opportunity to address racial biases through initiatives like reflective consultation.

Note: Small populations at times result in extreme outliers, which are truncated in this chart because the upper limit of the graph is set below these measures.

Racial equity must remain central.

Rates of maltreatment and placement by age and race show disparities among children who are Black and white. Reforms must address racial equity and be evaluated for different demographics. Not only race and ethnicity, but age, sexuality, gender, and disabilities are all characteristics that are important to recognize and drill into. Racial disparity measures indicate there is an opportunity to address racial biases through initiatives like reflective consultation.

Note: Small populations at times result in extreme outliers, which are truncated in this chart because the upper limit of the graph is set below these measures.

Child Population: 8,665	Children in Care: 33	Maltreatment Recurrence Rate: 2.1%
Black: 2%	Rate of Maltreatment: 4.6	Re-entry Rate: 0.0%
Hispanic: 3%	Placement Rate: 3.8	Report Recurrence Rate: 12.4%
White: 92%		

First and foremost, keep children safe.

This profile includes key indicators that measure how well communities are doing in ensuring the safety, permanency, stability and equity of children and youth who experience maltreatment. The measures are important but they don't tell the whole story. Youth with lived experience have spoken: Ohio must systematically capture youth experiences from their own perspective to measure performance.

Notes: Child population by race and hispanic origin is from 2019. Placement rates: In 2020, the rate of children per 1,000 in the population who were in substitute or foster care. Maltreatment rate: In 2020, the rate of children per 1,000 in the population who had a substantiated report of child abuse or neglect. Maltreatment Recurrence Rate: In 2021, the percent of children who were victims of a substantiated report of maltreatment during a 12-month period, that were victims of another substantiated maltreatment report within 12 months of their initial report. Re-entry rate: In 2021, the percent of children discharged to reunification, living with a relative, or guardianship 12 months ago that re-entered foster care within 12 months. Maltreatment Report Recurrence: In 2021, the percent of children with a screened-in report of maltreatment during a 12 month period (regardless of finding) who had another screened-in report within 12 months. Standards and averages are shown using a red line in charts.

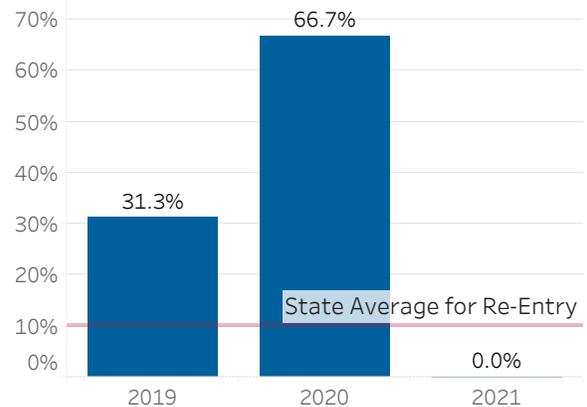

Every child deserves to be listened to.

Youth who have been in foster care said the most effective performance measures should be captured from youth themselves. Ask them: Do you feel safe in your placement? How would you rate your relationship with your caseworker? Are you aware of the Foster Youth Bill of Rights? Responses to these questions should be measured at the county-level and included alongside other measures when evaluating the impact of reforms.

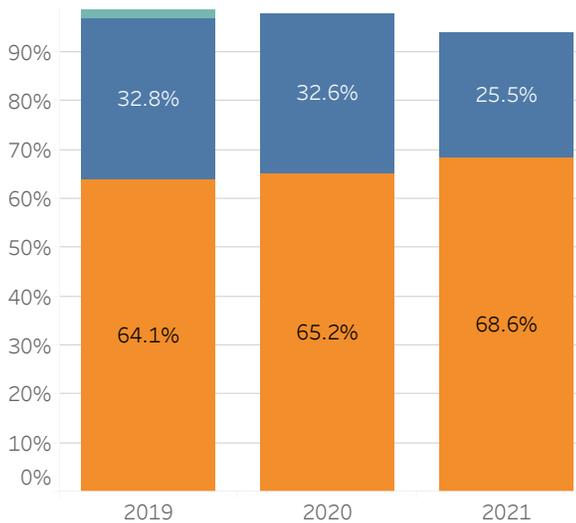

Total Number of Youth who Aged out of Foster Care

Note: Counties have blank data if there are fewer than 10 children or if the rate was zero during the period.

Maltreatment Recurrence Rate: In 2021, the percent of children who were victims of a substantiated report of maltreatment during a 12-month period, that were victims of another substantiated maltreatment report within 12 months of their initial report. Re-entry rate: In 2021, the percent of children discharged to reunification, living with a relative, or guardianship 12 months ago that re-entered foster care within 12 months. Maltreatment Report Recurrence: In 2021, the percent of children with a screened-in report of maltreatment during a 12 month period (regardless of finding) who had another screened-in report within 12 months. Standards and averages are shown using a red line in charts.

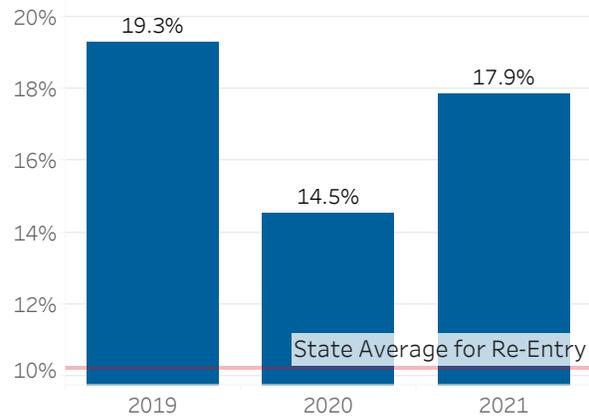

Every child deserves to be listened to.

Youth who have been in foster care said the most effective performance measures should be captured from youth themselves. Ask them: Do you feel safe in your placement? How would you rate your relationship with your caseworker? Are you aware of the Foster Youth Bill of Rights? Responses to these questions should be measured at the county-level and included alongside other measures when evaluating the impact of reforms.

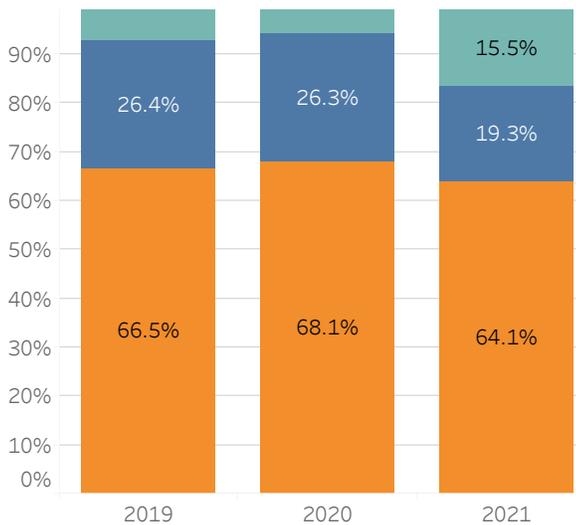

Total Number of Youth who Aged out of Foster Care

Note: Counties have blank data if there are fewer than 10 children or if the rate was zero during the period.

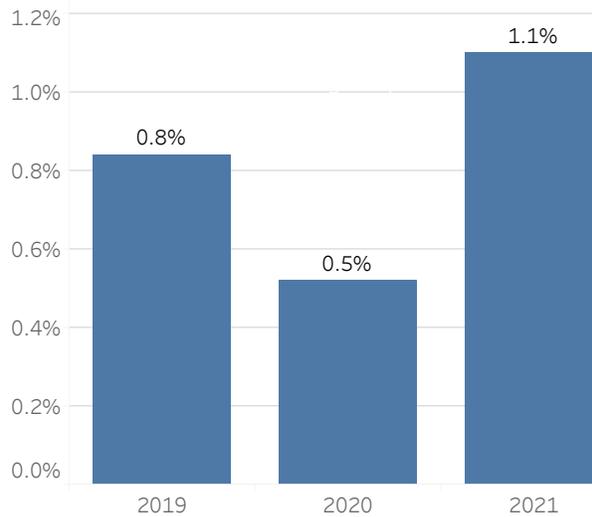

Percent of Children who Re-enter Care within the Year

Percent of Children Placed in Congregant Care, Kinship Care and Family Foster Care

Placement Category

- Kinship Care
- Congregate Care
- Family Foster Care

Percent of Children who Experienced a Trial Home Visit, Independent Living, or who Ran Away

Note: Counties have blank data if the rate was zero during the period.

Placement Type

Racial equity must remain central.

Rates of maltreatment and placement by age and race show disparities among children who are Black and white. Reforms must address racial equity and be evaluated for different demographics. Not only race and ethnicity, but age, sexuality, gender, and disabilities are all characteristics that are important to recognize and drill into. Racial disparity measures indicate there is an opportunity to address racial biases through initiatives like reflective consultation.

Note: Small populations at times result in extreme outliers, which are truncated in this chart because the upper limit of the graph is set below these measures.

Child Population: 8,565	Children in Care: 155	Maltreatment Recurrence Rate: 7.5%
Black: 2%	Rate of Maltreatment: 16.0	Re-entry Rate: 2.1%
Hispanic: 2%	Placement Rate: 18.1	Report Recurrence Rate: 22.0%
White: 93%		

First and foremost, keep children safe.

This profile includes key indicators that measure how well communities are doing in ensuring the safety, permanency, stability and equity of children and youth who experience maltreatment. The measures are important but they don't tell the whole story. Youth with lived experience have spoken: Ohio must systematically capture youth experiences from their own perspective to measure performance.

Notes: Child population by race and hispanic origin is from 2019. Placement rates: In 2020, the rate of children per 1,000 in the population who were in substitute or foster care. Maltreatment rate: In 2020, the rate of children per 1,000 in the population who had a substantiated report of child abuse or neglect. Maltreatment Recurrence Rate: In 2021, the percent of children who were victims of a substantiated report of maltreatment during a 12-month period, that were victims of another substantiated maltreatment report within 12 months of their initial report. Re-entry rate: In 2021, the percent of children discharged to reunification, living with a relative, or guardianship 12 months ago that re-entered foster care within 12 months. Maltreatment Report Recurrence: In 2021, the percent of children with a screened-in report of maltreatment during a 12 month period (regardless of finding) who had another screened-in report within 12 months. Standards and averages are shown using a red line in charts.

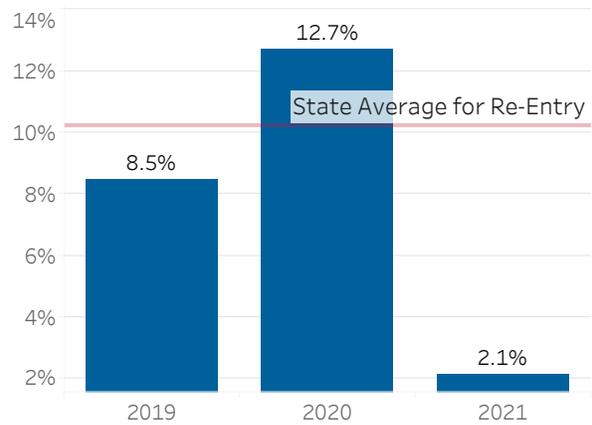

Every child deserves to be listened to.

Youth who have been in foster care said the most effective performance measures should be captured from youth themselves. Ask them: Do you feel safe in your placement? How would you rate your relationship with your caseworker? Are you aware of the Foster Youth Bill of Rights? Responses to these questions should be measured at the county-level and included alongside other measures when evaluating the impact of reforms.

Total Number of Youth who Aged out of Foster Care

Note: Counties have blank data if there are fewer than 10 children or if the rate was zero during the period.

Every child deserves to be listened to.

Youth who have been in foster care said the most effective performance measures should be captured from youth themselves. Ask them: Do you feel safe in your placement? How would you rate your relationship with your caseworker? Are you aware of the Foster Youth Bill of Rights? Responses to these questions should be measured at the county-level and included alongside other measures when evaluating the impact of reforms.

Total Number of Youth who Aged out of Foster Care

Note: Counties have blank data if there are fewer than 10 children or if the rate was zero during the period.

Percent of Children who Re-enter Care within the Year

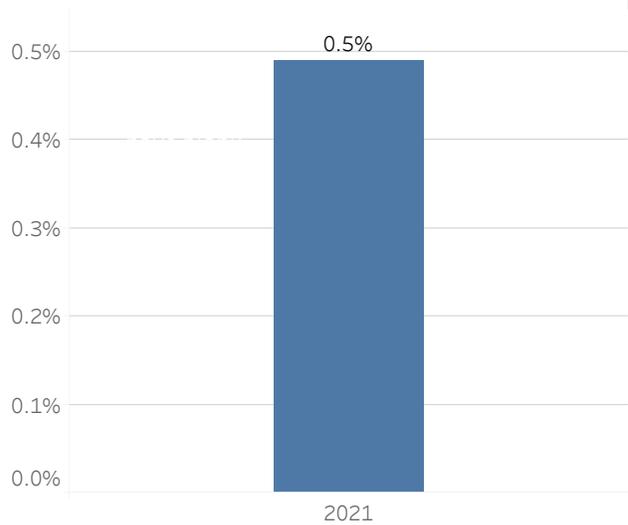

Percent of Children Placed in Congregant Care, Kinship Care and Family Foster Care

Percent of Children who Experienced a Trial Home Visit, Independent Living, or who Ran Away

Note: Counties have blank data if the rate was zero during the period.

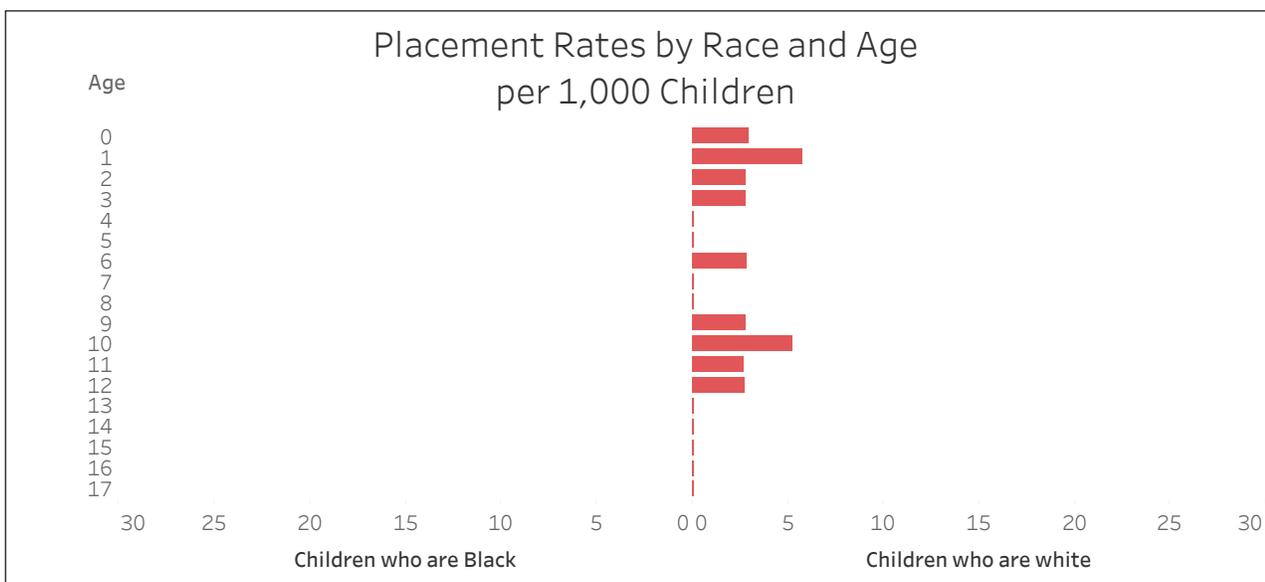

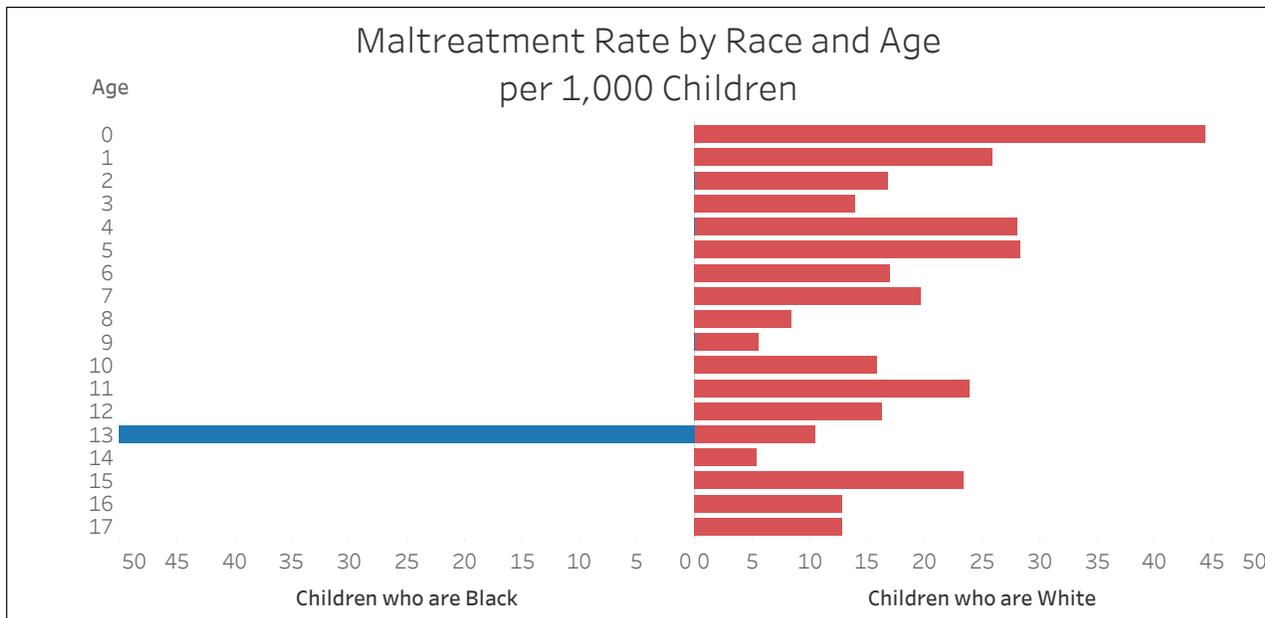

Placement Category
 ■ Congregant Care
 ■ Family Foster Care

Placement Type

Racial equity must remain central.

Rates of maltreatment and placement by age and race show disparities among children who are Black and white. Reforms must address racial equity and be evaluated for different demographics. Not only race and ethnicity, but age, sexuality, gender, and disabilities are all characteristics that are important to recognize and drill into. Racial disparity measures indicate there is an opportunity to address racial biases through initiatives like reflective consultation.

Note: Small populations at times result in extreme outliers, which are truncated in this chart because the upper limit of the graph is set below these measures.

Notes: Child population by race and hispanic origin is from 2019. Placement rates: In 2020, the rate of children per 1,000 in the population who were in substitute or foster care. Maltreatment rate: In 2020, the rate of children per 1,000 in the population who had a substantiated report of child abuse or neglect. Maltreatment Recurrence Rate: In 2021, the percent of children who were victims of a substantiated report of maltreatment during a 12-month period, that were victims of another substantiated maltreatment report within 12 months of their initial report. Re-entry rate: In 2021, the percent of children discharged to reunification, living with a relative, or guardianship 12 months ago that re-entered foster care within 12 months. Maltreatment Report Recurrence: In 2021, the percent of children with a screened-in report of maltreatment during a 12 month period (regardless of finding) who had another screened-in report within 12 months. Standards and averages are shown using a red line in charts.

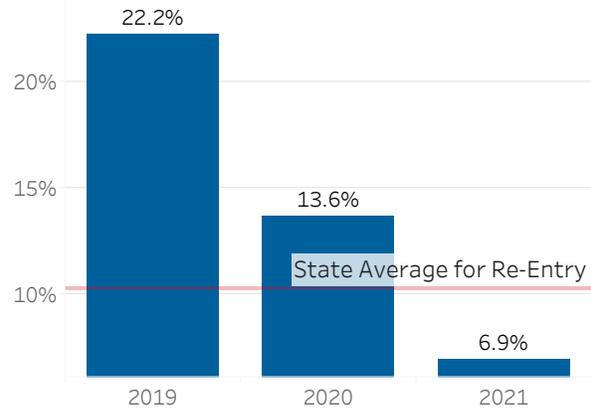

Every child deserves to be listened to.

Youth who have been in foster care said the most effective performance measures should be captured from youth themselves. Ask them: Do you feel safe in your placement? How would you rate your relationship with your caseworker? Are you aware of the Foster Youth Bill of Rights? Responses to these questions should be measured at the county-level and included alongside other measures when evaluating the impact of reforms.

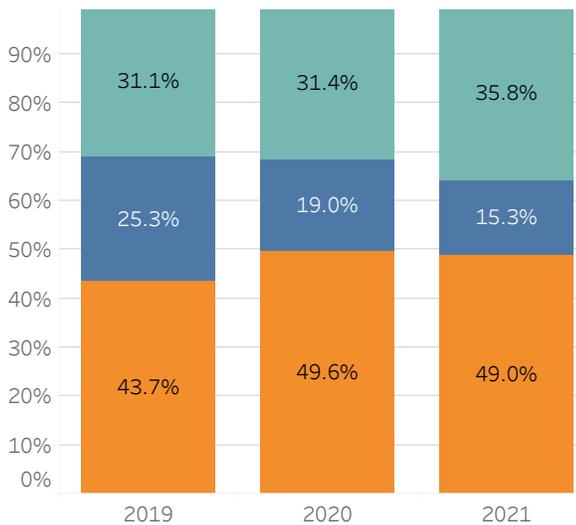

Total Number of Youth who Aged out of Foster Care

Note: Counties have blank data if there are fewer than 10 children or if the rate was zero during the period.

- Congregate Care
- Family Foster Care

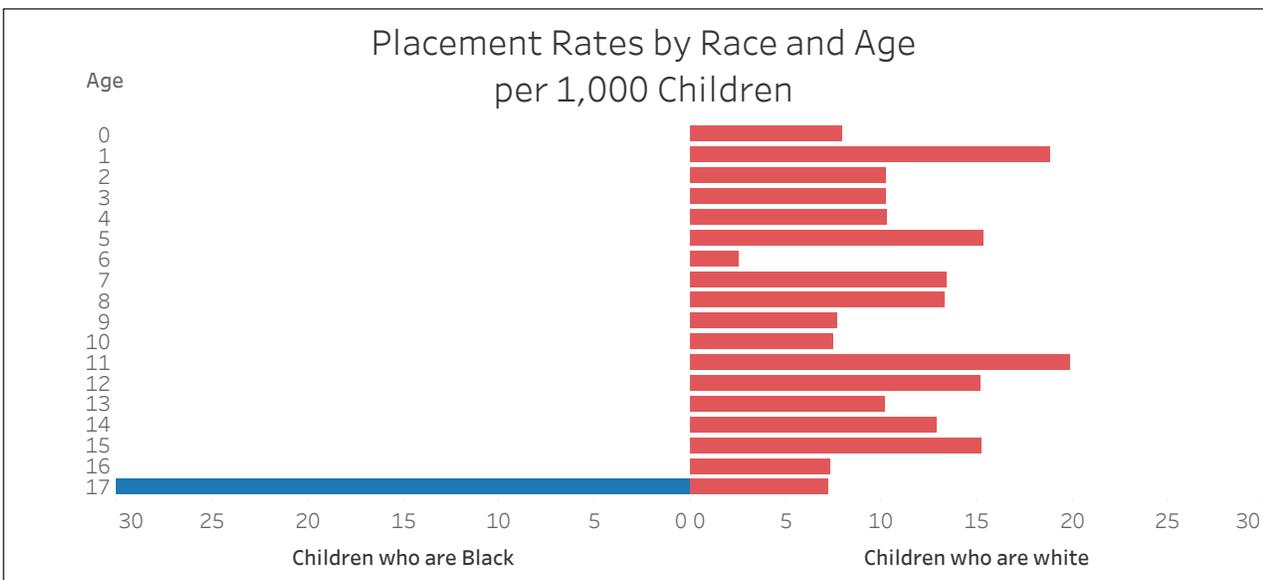

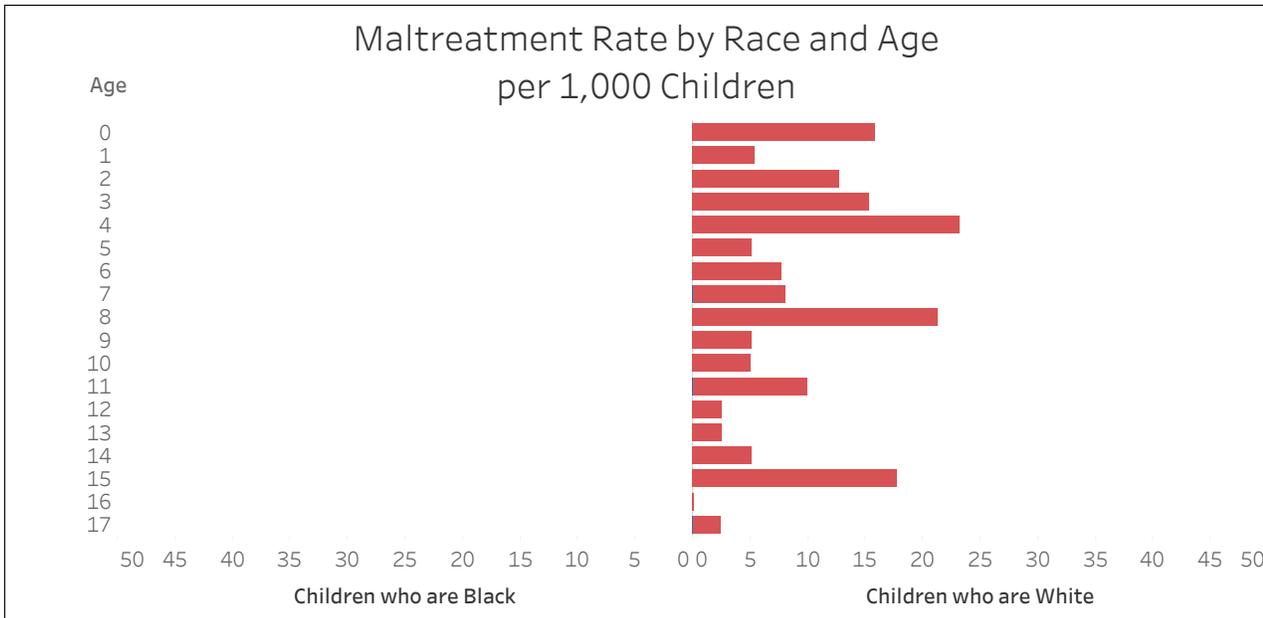

Percent of Children who Experienced a Trial Home Visit, Independent Living, or who Ran Away

Placement Type

- Independent Living

Racial equity must remain central.

Rates of maltreatment and placement by age and race show disparities among children who are Black and white. Reforms must address racial equity and be evaluated for different demographics. Not only race and ethnicity, but age, sexuality, gender, and disabilities are all characteristics that are important to recognize and drill into. Racial disparity measures indicate there is an opportunity to address racial biases through initiatives like reflective consultation.

Note: Small populations at times result in extreme outliers, which are truncated in this chart because the upper limit of the graph is set below these measures.

- Family Foster Care

Percent of Children who Experienced a Trial Home Visit, Independent Living, or who Ran Away

Note: Counties have blank data if the rate was zero during the period.

Placement Type

Racial equity must remain central.

Rates of maltreatment and placement by age and race show disparities among children who are Black and white. Reforms must address racial equity and be evaluated for different demographics. Not only race and ethnicity, but age, sexuality, gender, and disabilities are all characteristics that are important to recognize and drill into. Racial disparity measures indicate there is an opportunity to address racial biases through initiatives like reflective consultation.

Note: Small populations at times result in extreme outliers, which are truncated in this chart because the upper limit of the graph is set below these measures.

<https://cdfohio.org/policy/resources/kids-count/kids-count-databooks/>

Child Population: 7,954	Children in Care: 49	Maltreatment Recurrence Rate: 7.1%
Black: 1%	Rate of Maltreatment: 3.3	Re-entry Rate: 6.3%
Hispanic: 2%	Placement Rate: 6.2	Report Recurrence Rate: 21.4%
White: 96%		

First and foremost, keep children safe.

This profile includes key indicators that measure how well communities are doing in ensuring the safety, permanency, stability and equity of children and youth who experience maltreatment. The measures are important but they don't tell the whole story. Youth with lived experience have spoken: Ohio must systematically capture youth experiences from their own perspective to measure performance.

Notes: Child population by race and hispanic origin is from 2019. Placement rates: In 2020, the rate of children per 1,000 in the population who were in substitute or foster care. Maltreatment rate: In 2020, the rate of children per 1,000 in the population who had a substantiated report of child abuse or neglect. Maltreatment Recurrence Rate: In 2021, the percent of children who were victims of a substantiated report of maltreatment during a 12-month period, that were victims of another substantiated maltreatment report within 12 months of their initial report. Re-entry rate: In 2021, the percent of children discharged to reunification, living with a relative, or guardianship 12 months ago that re-entered foster care within 12 months. Maltreatment Report Recurrence: In 2021, the percent of children with a screened-in report of maltreatment during a 12 month period (regardless of finding) who had another screened-in report within 12 months. Standards and averages are shown using a red line in charts.

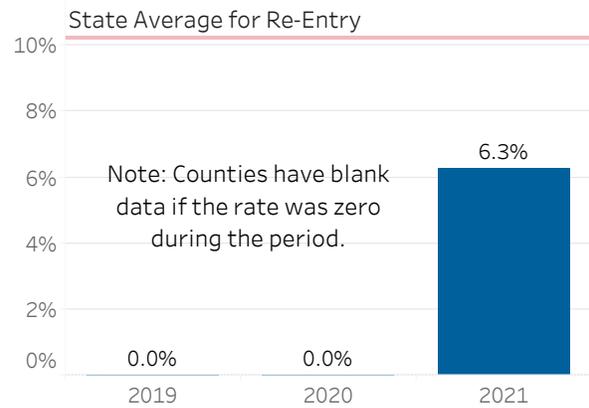

Every child deserves to be listened to.

Youth who have been in foster care said the most effective performance measures should be captured from youth themselves. Ask them: Do you feel safe in your placement? How would you rate your relationship with your caseworker? Are you aware of the Foster Youth Bill of Rights? Responses to these questions should be measured at the county-level and included alongside other measures when evaluating the impact of reforms.

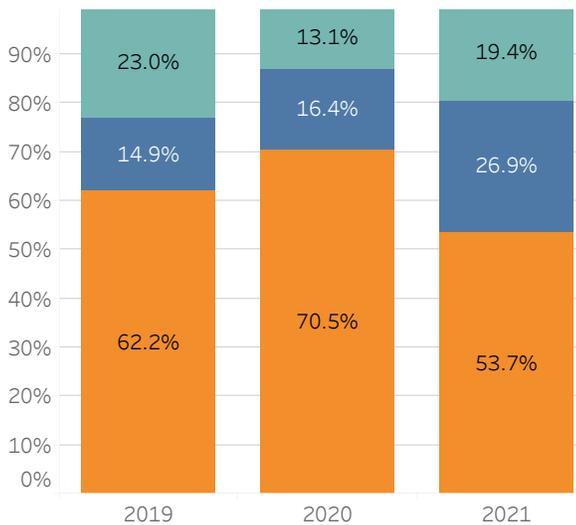

Total Number of Youth who Aged out of Foster Care

Hispanic: 2%	Placement Rate: 20.9	Report Recurrence Rate: 25.1%
White: 95%		

First and foremost, keep children safe.

This profile includes key indicators that measure how well communities are doing in ensuring the safety, permanency, stability and equity of children and youth who experience maltreatment. The measures are important but they don't tell the whole story. Youth with lived experience have spoken: Ohio must systematically capture youth experiences from their own perspective to measure performance.

Notes: Child population by race and hispanic origin is from 2019. Placement rates: In 2020, the rate of children per 1,000 in the population who were in substitute or foster care. Maltreatment rate: In 2020, the rate of children per 1,000 in the population who had a substantiated report of child abuse or neglect. Maltreatment Recurrence Rate: In 2021, the percent of children who were victims of a substantiated report of maltreatment during a 12-month period, that were victims of another substantiated maltreatment report within 12 months of their initial report. Re-entry rate: In 2021, the percent of children discharged to reunification, living with a relative, or guardianship 12 months ago that re-entered foster care within 12 months. Maltreatment Report Recurrence: In 2021, the percent of children with a screened-in report of maltreatment during a 12 month period (regardless of finding) who had another screened-in report within 12 months. Standards and averages are shown using a red line in charts.

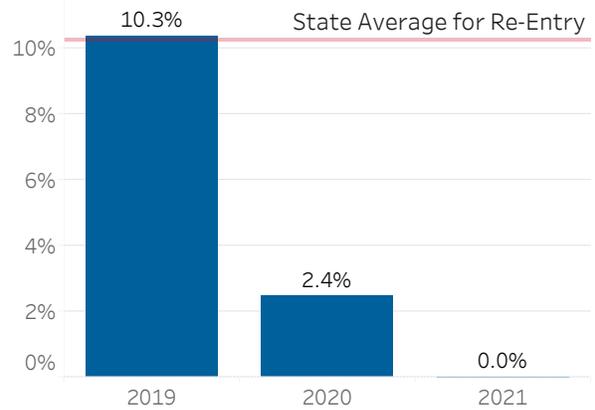

Every child deserves to be listened to.

Youth who have been in foster care said the most effective performance measures should be captured from youth themselves. Ask them: Do you feel safe in your placement? How would you rate your relationship with your caseworker? Are you aware of the Foster Youth Bill of Rights? Responses to these questions should be measured at the county-level and included alongside other measures when evaluating the impact of reforms.

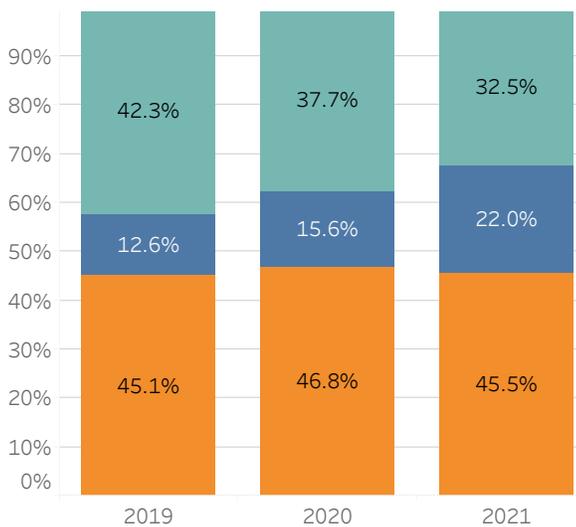

Total Number of Youth who Aged out of Foster Care

Note: Counties have blank data if there are fewer than 10 children or if the rate was zero during the period.

Percent of Children who Re-enter Care within the Year

Percent of Children Placed in Congregant Care, Kinship Care and Family Foster Care

Percent of Children who Experienced a Trial Home Visit, Independent Living, or who Ran Away

Note: Counties have blank data if the rate was zero during the period.

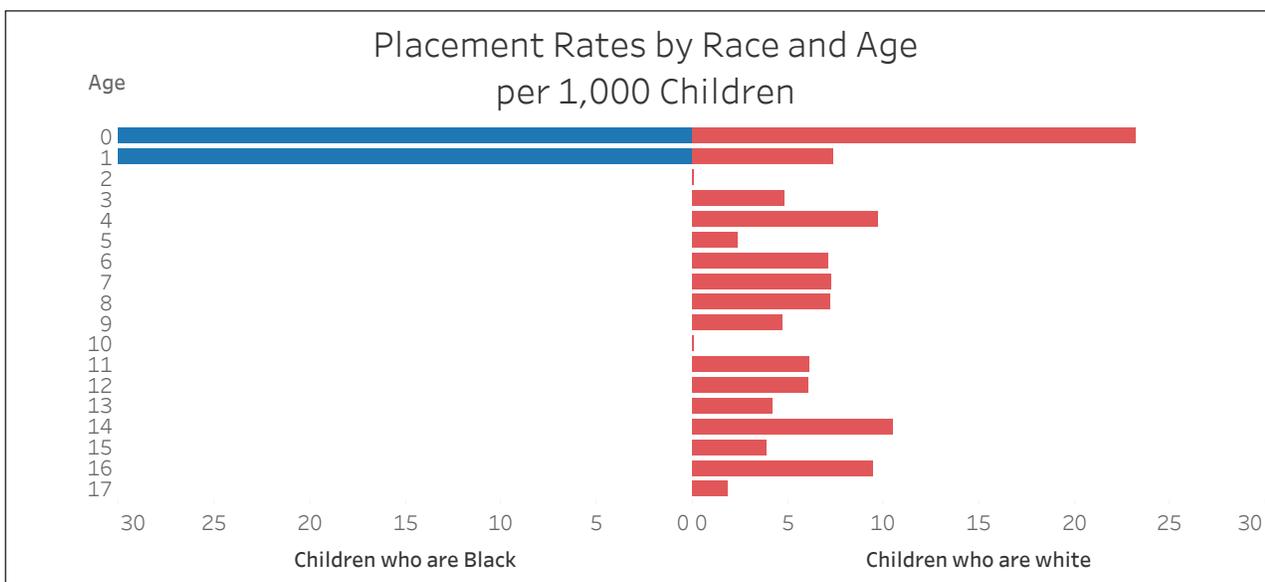

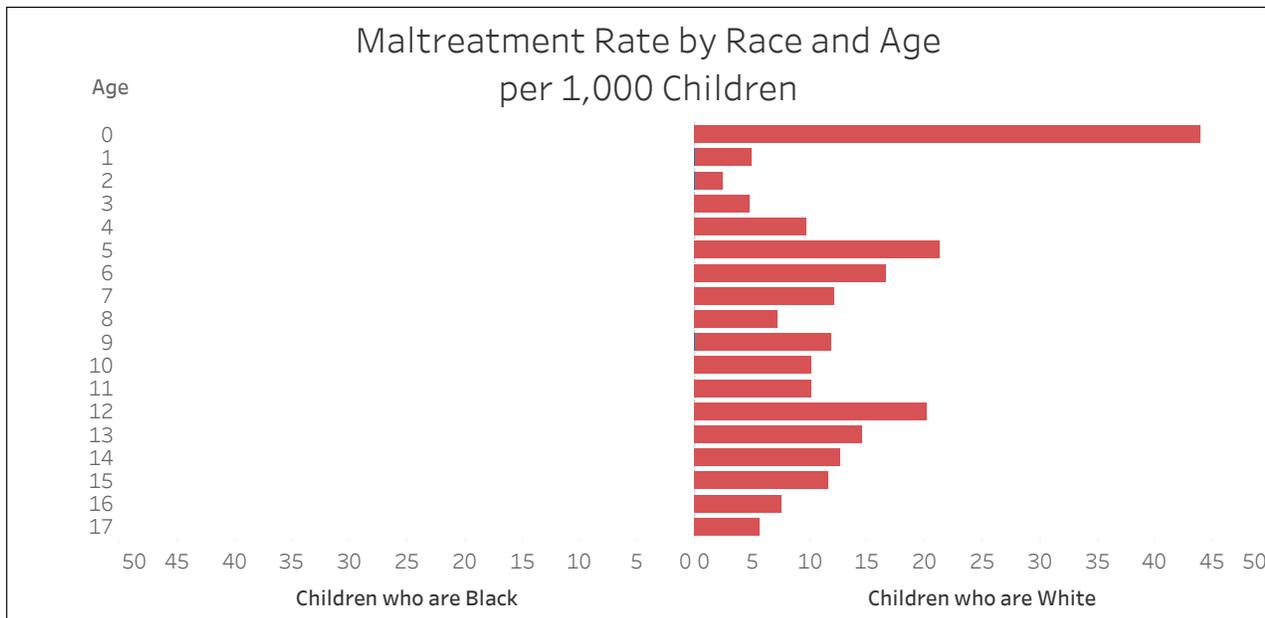

Placement Category

- Kinship Care
- Congregate Care
- Family Foster Care

Placement Type

Racial equity must remain central.

Rates of maltreatment and placement by age and race show disparities among children who are Black and white. Reforms must address racial equity and be evaluated for different demographics. Not only race and ethnicity, but age, sexuality, gender, and disabilities are all characteristics that are important to recognize and drill into. Racial disparity measures indicate there is an opportunity to address racial biases through initiatives like reflective consultation.

Note: Small populations at times result in extreme outliers, which are truncated in this chart because the upper limit of the graph is set below these measures.

<https://cdfohio.org/policy/resources/kids-count/kids-count-databooks/>

Child Population: 40,198	Children in Care: 222	Maltreatment Recurrence Rate: 5.3%
Black: 11%	Rate of Maltreatment: 2.9	Re-entry Rate: 13.8%
Hispanic: 3%	Placement Rate: 5.5	Report Recurrence Rate: 21.1%
White: 83%		

First and foremost, keep children safe.

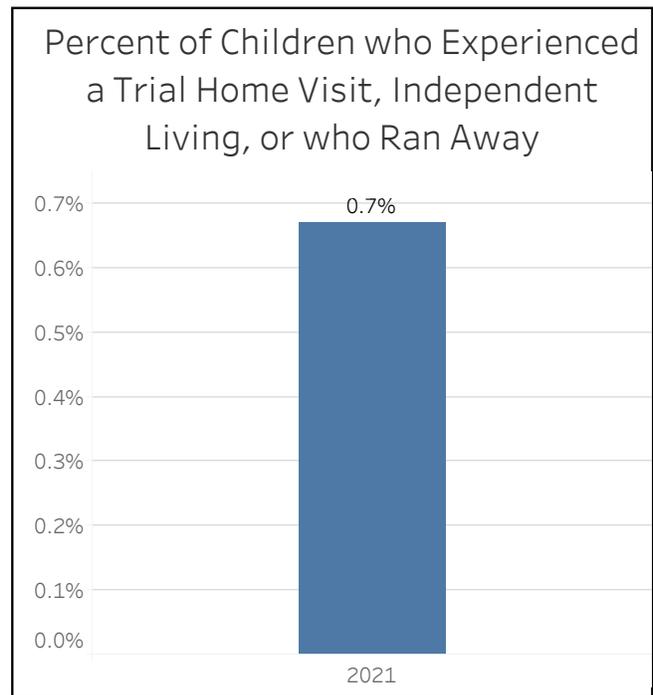

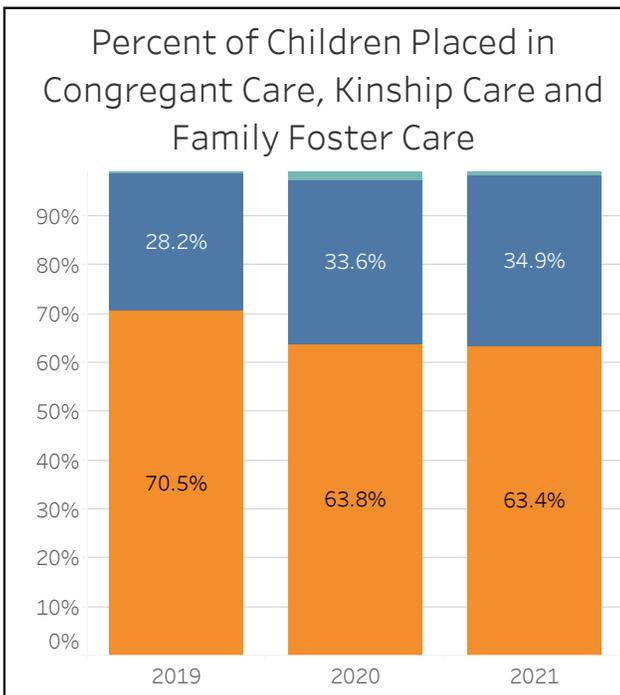

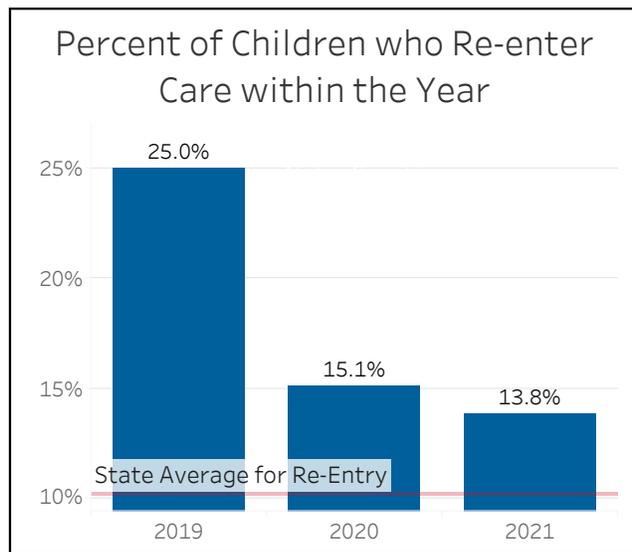

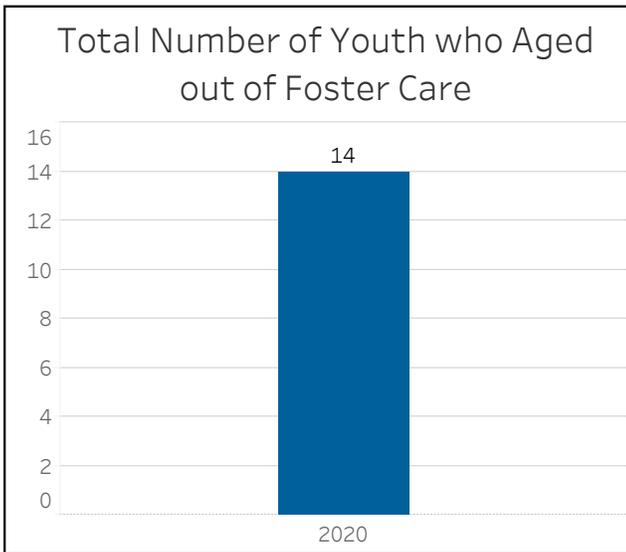

This profile includes key indicators that measure how well communities are doing in ensuring the safety, permanency, stability and equity of children and youth who experience maltreatment. The measures are important but they don't tell the whole story. Youth with lived experience have spoken: Ohio must systematically capture youth experiences from their own perspective to measure performance.

Notes: Child population by race and hispanic origin is from 2019. Placement rates: In 2020, the rate of children per 1,000 in the population who were in substitute or foster care. Maltreatment rate: In 2020, the rate of children per 1,000 in the population who had a substantiated report of child abuse or neglect. Maltreatment Recurrence Rate: In 2021, the percent of children who were victims of a substantiated report of maltreatment during a 12-month period, that were victims of another substantiated maltreatment report within 12 months of their initial report. Re-entry rate: In 2021, the percent of children discharged to reunification, living with a relative, or guardianship 12 months ago that re-entered foster care within 12 months. Maltreatment Report Recurrence: In 2021, the percent of children with a screened-in report of maltreatment during a 12 month period (regardless of finding) who had another screened-in report within 12 months. Standards and averages are shown using a red line in charts.

Every child deserves to be listened to.

Youth who have been in foster care said the most effective performance measures should be captured from youth themselves. Ask them: Do you feel safe in your placement? How would you rate your relationship with your caseworker? Are you aware of the Foster Youth Bill of Rights? Responses to these questions should be measured at the county-level and included alongside other measures when evaluating the impact of reforms.

Placement Category

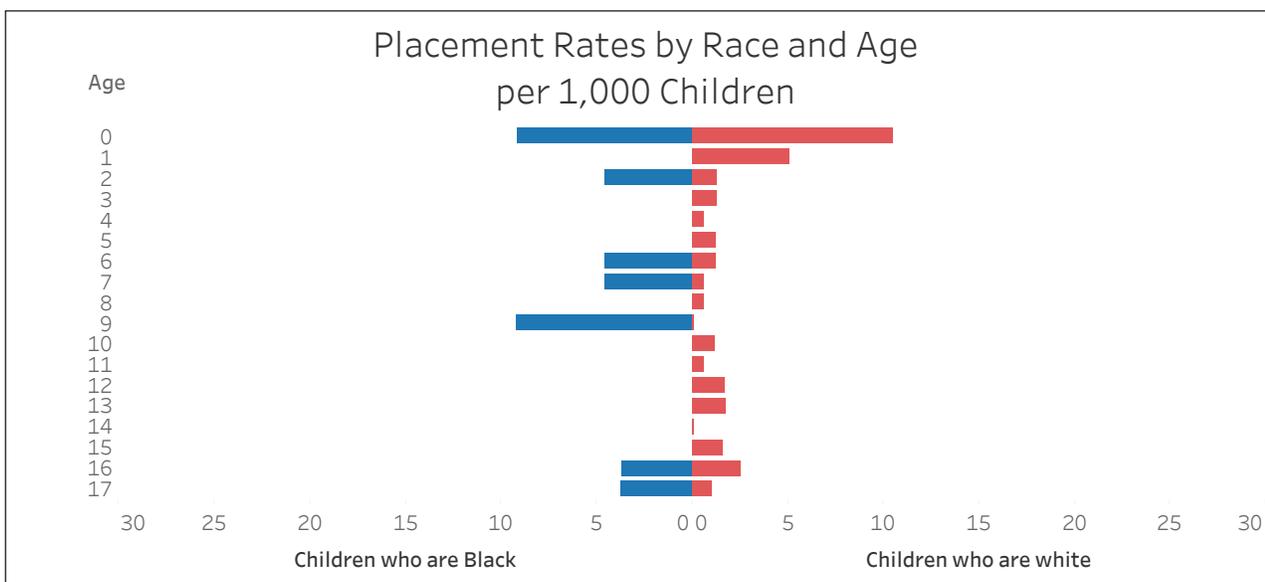

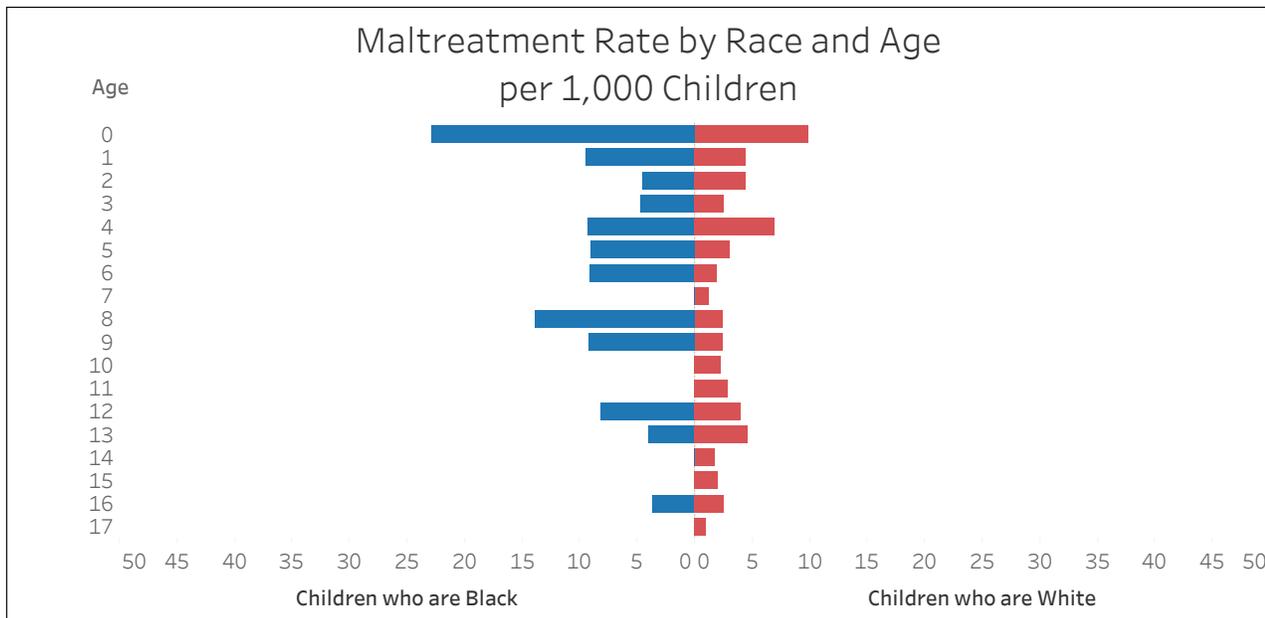

- Kinship Care
- Congregate Care
- Family Foster Care

Placement Type

- Independent Living

Racial equity must remain central.

Rates of maltreatment and placement by age and race show disparities among children who are Black and white. Reforms must address racial equity and be evaluated for different demographics. Not only race and ethnicity, but age, sexuality, gender, and disabilities are all characteristics that are important to recognize and drill into. Racial disparity measures indicate there is an opportunity to address racial biases through initiatives like reflective consultation.

Note: Small populations at times result in extreme outliers, which are truncated in this chart because the upper limit of the graph is set below these measures.

IN CHILD WELFARE

Wyandot County

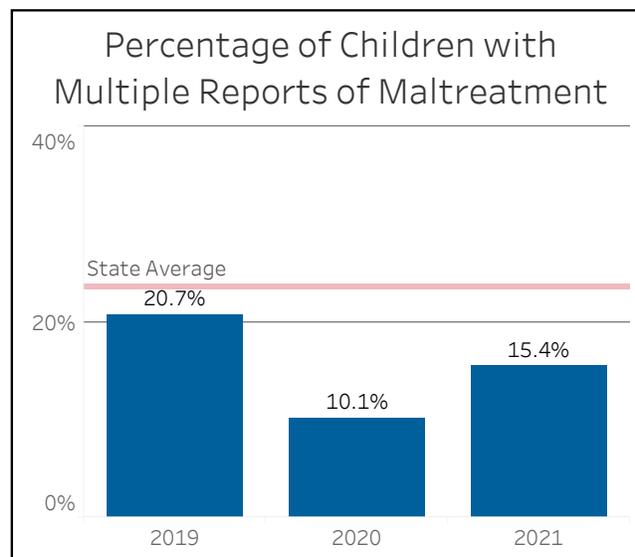

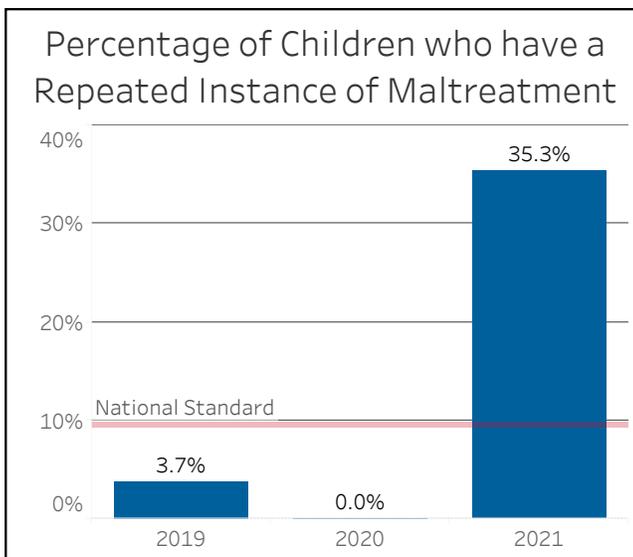

Are child welfare reforms having an impact? Read the full report to learn more about performance measures and hear perspectives from youth with lived experience in foster care.

<https://cdfohio.org/policy/resources/kids-count/kids-count-databooks/>

Child Population: 4,905	Children in Care: 30	Maltreatment Recurrence Rate: 35.3%
Black: 1%	Rate of Maltreatment: 3.3	Re-entry Rate: 0.0%
Hispanic: 6%	Placement Rate: 6.1	Report Recurrence Rate: 15.4%
White: 96%		

First and foremost, keep children safe.

This profile includes key indicators that measure how well communities are doing in ensuring the safety, permanency, stability and equity of children and youth who experience maltreatment. The measures are important but they don't tell the whole story. Youth with lived experience have spoken: Ohio must systematically capture youth experiences from their own perspective to measure performance.

Notes: Child population by race and hispanic origin is from 2019. Placement rates: In 2020, the rate of children per 1,000 in the population who were in substitute or foster care. Maltreatment rate: In 2020, the rate of children per 1,000 in the population who had a substantiated report of child abuse or neglect. Maltreatment Recurrence Rate: In 2021, the percent of children who were victims of a substantiated report of maltreatment during a 12-month period, that were victims of another substantiated maltreatment report within 12 months of their initial report. Re-entry rate: In 2021, the percent of children discharged to reunification, living with a relative, or guardianship 12 months ago that re-entered foster care within 12 months. Maltreatment Report Recurrence: In 2021, the percent of children with a screened-in report of maltreatment during a 12 month period (regardless of finding) who had another screened-in report within 12 months. Standards and averages are shown using a red line in charts.

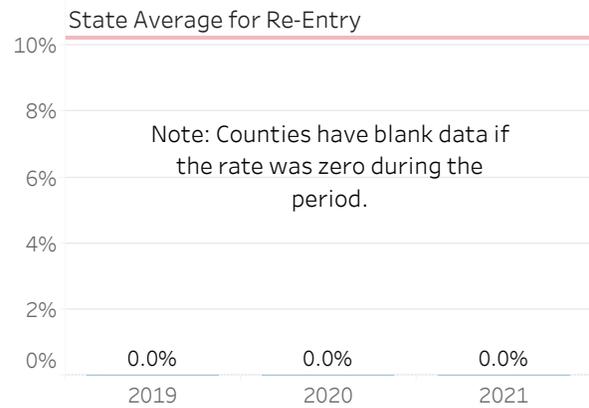

Every child deserves to be listened to.

Youth who have been in foster care said the most effective performance measures should be captured from youth themselves. Ask them: Do you feel safe in your placement? How would you rate your relationship with your caseworker? Are you aware of the Foster Youth Bill of Rights? Responses to these questions should be measured at the county-level and included alongside other measures when evaluating the impact of reforms.

Total Number of Youth who Aged out of Foster Care

Note: Counties have blank data if there are fewer than 10 children or if the rate was zero during the period.

Percent of Children who Re-enter Care within the Year

Percent of Children Placed in Congregant Care, Kinship Care and Family Foster Care

Percent of Children who Experienced a Trial Home Visit, Independent Living, or who Ran Away

Note: Counties have blank data if the rate was zero during the period.

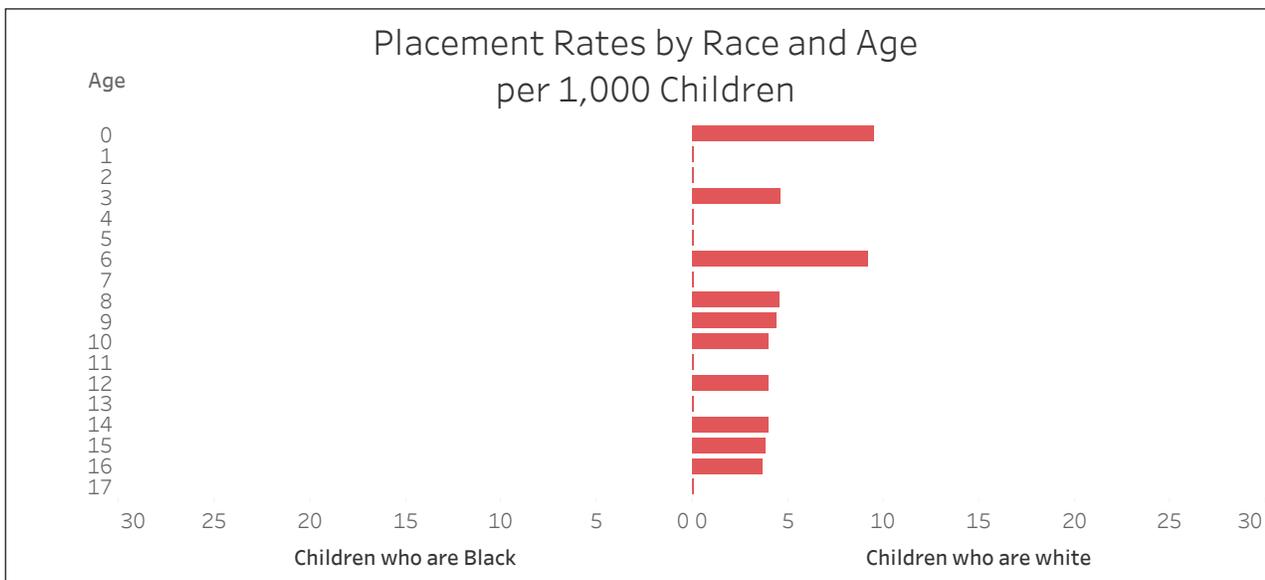

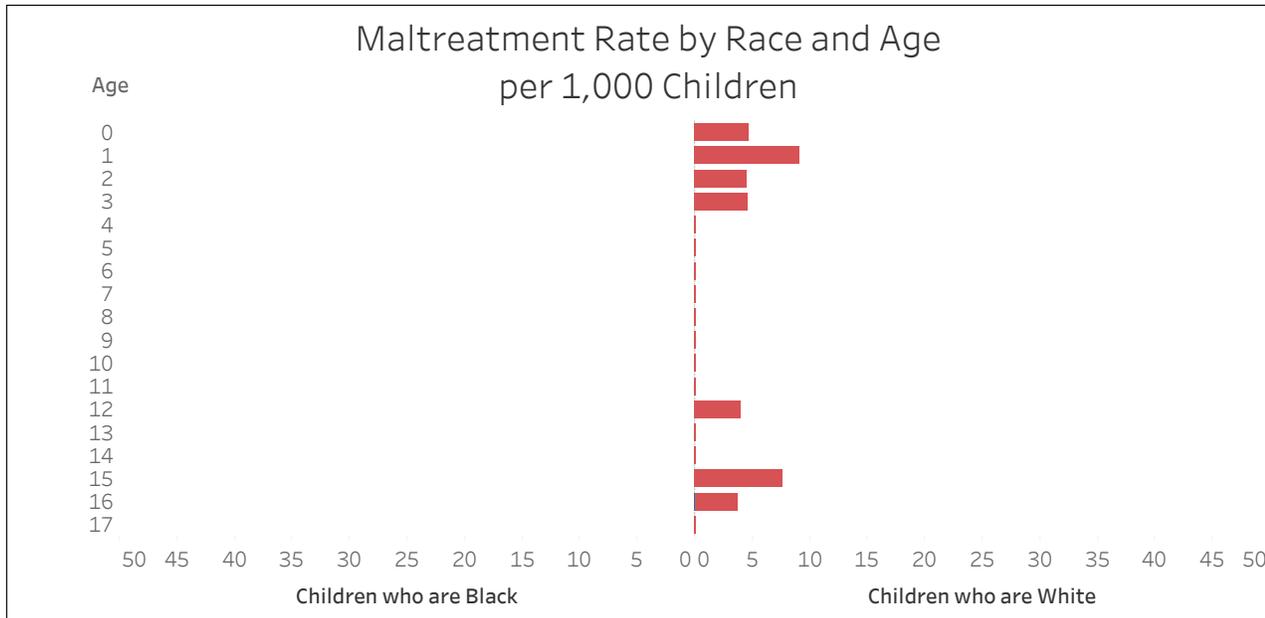

Placement Category

- Kinship Care
- Congregate Care
- Family Foster Care

Placement Type

Racial equity must remain central.

Rates of maltreatment and placement by age and race show disparities among children who are Black and white. Reforms must address racial equity and be evaluated for different demographics. Not only race and ethnicity, but age, sexuality, gender, and disabilities are all characteristics that are important to recognize and drill into. Racial disparity measures indicate there is an opportunity to address racial biases through initiatives like reflective consultation.

Note: Small populations at times result in extreme outliers, which are truncated in this chart because the upper limit of the graph is set below these measures.
